Electren acquires SEGADE and promotes development of energy infrastructure

24.07.2025

ACS Group, through Electren, has formalized the acquisition of SEGADE SAELCO, S.A., a company specializing in the design, construction, and maintenance of high-voltage power line infrastructure. This operation represents a strategic step forward in expanding the group's capacity in the development of energy infrastructure in Spain.

The integration of SEGADE comes at a time of profound transformation in the energy sector, driven by the ecological transition, digitalization, and the need to modernize the electricity grid. This modernization is key to meeting the growing demand arising from the construction of data centers and new industrial facilities dedicated to the

with this addition, the ACS Group strengthens its position as a key player in the development of energy infrastructure in the field of electricity generation, transmission and distribution, backed by a solid customer portfolio and aligned with its strategy of sustainable and technologically advanced growth both in Spain and internationally.
